O & M SUMMER CAMPAIGN

PRIORITY ISSUE: UPTIME & FLEXIBILITY

Offshore wind O&M managers are constantly striving for the optimum balance between running cost and electricity output. As O&M costs can take up to around 25% of the total cost of a wind farm, striking the cost balance is essential.

SUPPORTING YOUR SUCCESS

CWind's O&M Summer Campaign combines all the elements you need for a successful cost-effective summer campaign. While wind speeds are at their lowest and production losses are therefore minimised, CWind provides a 360° solution to your scheduled and unscheduled maintenance requirements.

EVERYTHING YOU'LL NEED FROM ONE SOURCE

Our Summer Campaign covers your annual maintenance plan in one season, providing the exact combination of logistics, turbine, cable and foundation maintenance to match your requirements—in one bespoke solution.

- A fleet of multi-purpose wind farm support vessels with large & flexible payload
- Boost your technician team or establish a project team just for the summer
- Experienced in handling export & array cables, tower teams for cable pull-ins & repairs, ROV piloted subsea cable surveys
- Add a foundation maintenance element using our team of inspections & remedial work experts
