# ULTRA + FAST IR

Now in High Definition. Really.

Telops HD-IR 1280 Scientific Camera

Shimadzu HyperVision HPV-X

Invisible Vision UHSi 12/24 Ultra High Speed Framing Camera

Stop by booths 33/34 and see what we're talking about.

**Hadland Imaging** & **Xcitex** – strategic partners for your imaging, software and ultra high-speed video needs!

**HADLAND**<sup>®</sup>  
IMAGING

CAMERAS • SYSTEMS • ACCESSORIES

Hadland Imaging is the industry-leading provider of visible & IR high-speed and ultra high-speed (UHS) cameras, specialized imaging systems & solutions and accessories. Providing excellent support to the industrial community with cutting-edge technology, exceptional service and expert training with over 25 years of experience.

**Xcitex**

FROM MOTION TO DATA TO KNOWLEDGE

Xcitex is an innovator in the industries of motion analysis and video-based motion capture. ProAnalyst<sup>®</sup> is the world's leading software for extracting (tracking), analyzing, and presenting motion from pre-recorded video. ProCapture is our high-speed low-cost motion capture system for video recording with synchronized data collection.

# Use Video as a Measurement Tool

Advanced scientific software for **extracting motion from video** – ideal for shock & vibration and materials research applications.

## ProAnalyst®

Innovative software for motion analysis.

ProAnalyst is the world's premier software package for automatically measuring moving objects with video. Used extensively by NASA, engineers, broadcasters, researchers and athletes, it's the ideal companion software to any prosumer, scientific and industrial video camera.

Use ProAnalyst to measure...

- strain
- displacement
- frequency response
- point-to-point correlation
- structural dynamics
- crash propagation

Visit us at booths 33/34 for free product demonstrations.
