

Immediate, long lasting protection.

Centaura provides your horse with protection against flies and mosquitoes for up to 24 hours, and against ticks for up to 4 hours. And **Centaura** gives you protection from mosquitoes for up to 8 hours; from biting flies for up to 5 hours; and from ticks for up to 4 hours.

Applying Centaura to your horse

Start by spraying **Centaura** directly onto areas that need immediate insect protection. After the application, the animal's coat should be damp. To apply to the head, simply spray **Centaura** on your hands and then rub the product into the horse's hair.

Applying Centaura to yourself

Spray **Centaura** evenly onto exposed skin for reliable, immediate and long-lasting insect protection. To apply **Centaura** to your face, simply spray some on your hands and then rub gently onto your face.

The Airosol® advantage

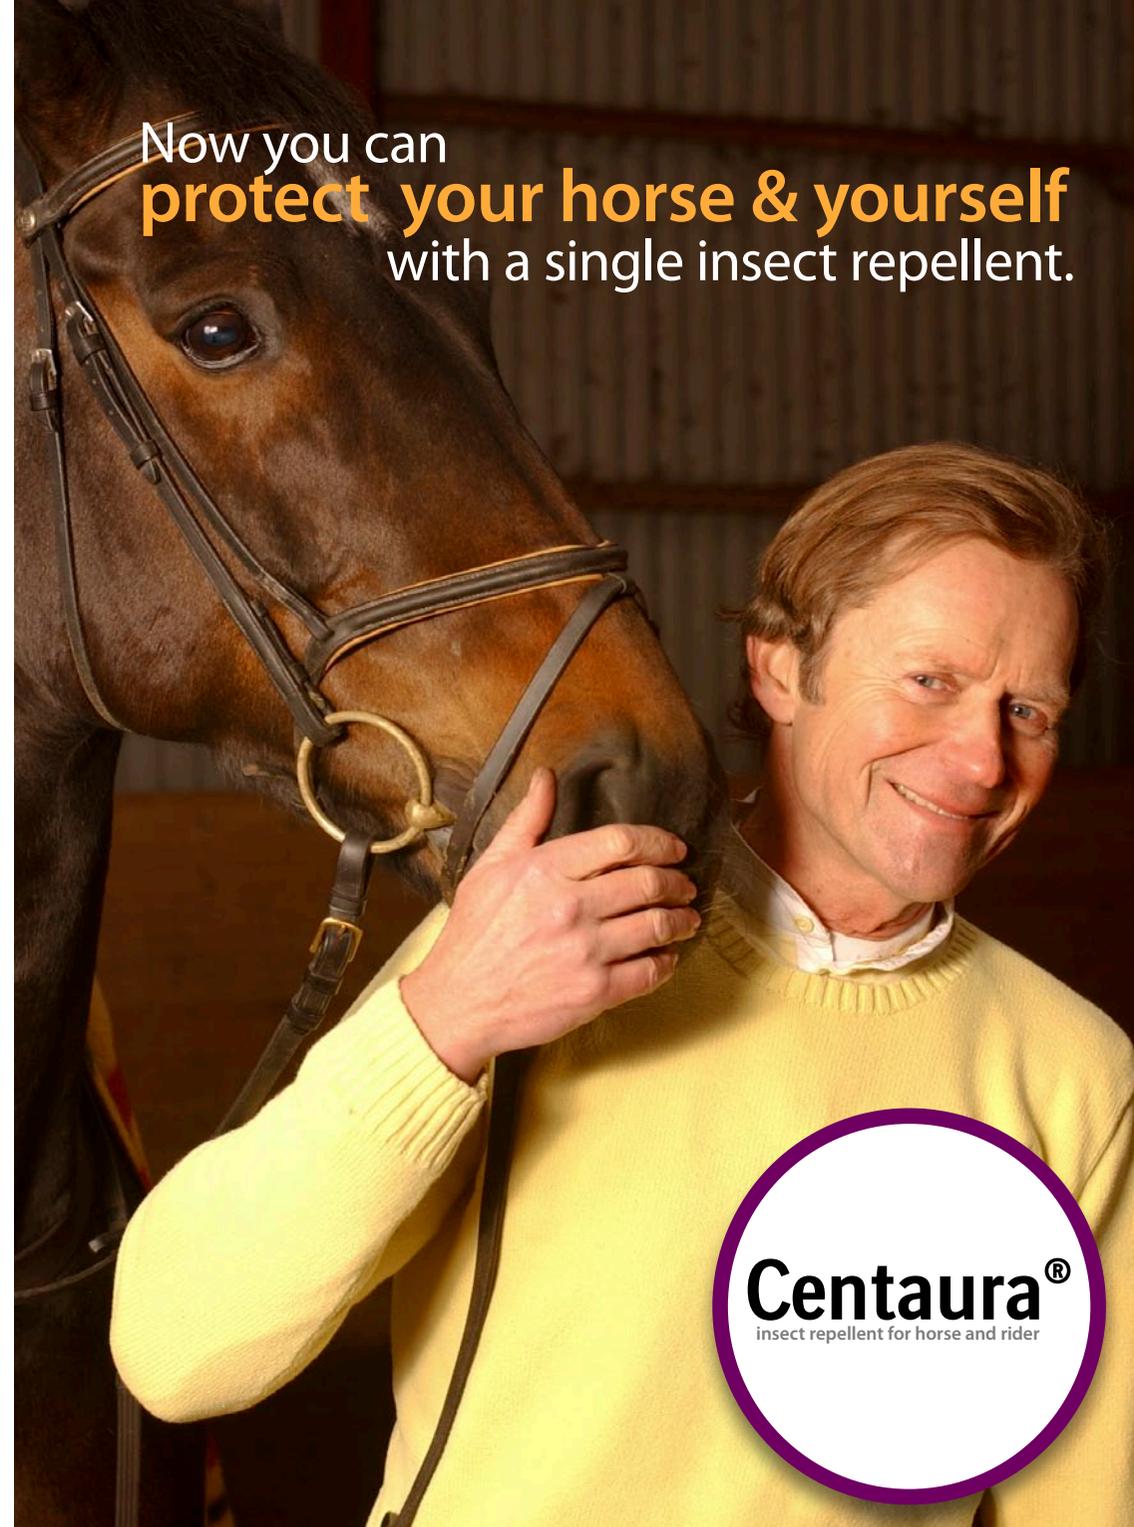

With its innovative Airosol air propellant system, which doesn't use the flammable or hazardous propellants of typical aerosol sprays, **Centaura** is easy to apply—even when the can is upside down, so you can protect all those hard-to-reach places.

Disclaimer: For the safe and effective use of insect repellents, always read the product label and instructions before application.

Now you can
protect your horse & yourself
with a single insect repellent.

Centaura®
insect repellent for horse and rider

Why Centaura?

Insects are more than a nuisance. They can transmit disease, aggravate skin conditions and cause allergic reactions. So whether you're a rider, a vet, a jockey or a trainer, **Centaura** brings your horse and you protection against a wide range of insects, including mosquitoes, ticks and flies.

Use Centaura when the insects begin to buzz

Use **Centaura** on your horse and yourself whenever you'll be outdoors — and wherever the insects are buzzing and beginning to bite. **Centaura** works instantly to provide you with up to 8 hours of insect protection — and up to 24 hours for your horse.

Trust Centaura

Centaura is so effective because it contains a high concentration of the active ingredient Saltidin. And Saltidin is the WHO's repellent of choice for malaria prevention, so you know you're getting a product you can trust.

Registered for use on horses and humans, Centaura's efficacy has been proven in a number of studies in a wide range of climates and against all common insects.

Centaura's comfortable, gentle formula is safe for everyone over the age of two and anyone with sensitive skin, **Centaura** is so gentle it won't harm your leather gear or stain your clothing. And with its pleasant scent and non-sticky formula, **Centaura** keeps you comfortable — and insect-free — all day long.

**8-24
HOURS
PROTECTION**

Centaura won't stain your clothing or gear. It's gentle on the skin and simple to apply, **keeping irritating insects away all day long.**
