Keeping Old CC Versions When Updating

Adobe released CC 2017 versions on November 2, 2016. You probably want update your apps to work with exciting new features in the 2017 release. Pressing **Update All** or individual **Update** buttons will remove previous versions of your apps. However, you may want to keep previous versions, especially if you are currently working on projects (since new versions may contains bugs that have yet to be worked out).

The following will allow you to keep previous versions of your CC apps while installing new versions.
Note: use the **individual Update buttons** to update each app.

Press **Advanced Options** to reveal options

Disable **Remove old versions** to keep previous versions of the app
